WELCOME TO World of Windoors

Your Trusted Partner for Premium UPVC Windows & Doors

At World of Windoors, we specialize in high-quality UPVC windows and doors, delivering durability, energy efficiency, and modern aesthetics to homes and businesses. Our commitment to excellence ensures that every product we offer is built to withstand the test of time while enhancing the beauty and security of your space.

With a wide range of stylish, weather-resistant, and low-maintenance UPVC solutions, we cater to both residential and commercial projects. Our expert team focuses on precision, innovation, and customer satisfaction, providing customized designs that match your unique needs.

Choose World of Windoors for superior craftsmanship, advanced technology, and eco-friendly solutions that redefine the way you experience comfort and elegance in your spaces.

We Manufacture High-Quality Windows and Doors tailored for :

Homes

Apartments, villas, and independent houses for energy efficiency and low maintenance.

Educational Institutions

Schools and universities use uPVC windows for their durability and insulation properties.

Commercial Buildings

Offices, shopping malls, and retail stores due to their durability and soundproofing.

Industrial Building

Factories and warehouses benefit from their resistance to corrosion and chemicals.

High-Rise Apartments

Preferred in skyscrapers because they are lightweight, weather-resistant, and require minimal upkeep.

Hospitals & Clinics

Used for their sound insulation, hygiene benefits, and easy cleaning.

Hotels & Resorts

Provide aesthetic appeal, noise reduction, and weather resistance.

ADVANTAGE OF uPVC WINDOWS & DOOR

World of Windoor, we bring you premium UPVC windows and doors that redefine elegance, durability, and energy efficiency. Designed to withstand extreme weather conditions, our UPVC solutions offer superior insulation, noise reduction, and low maintenance, making them the ideal choice for modern homes and commercial spaces.

Why Choose UPVC Windows & Doors?

Durability & Strength

Our UPVC frames are resistant to moisture, termites, and corrosion, ensuring long-lasting performance without warping, fading, or cracking.

Noise Reduction

Enjoy peace and quiet with our soundproof designs that significantly reduce external noise, making them perfect for urban environments.

Energy Efficiency

Experience year-round comfort with exceptional thermal insulation that reduces energy costs by keeping your interiors cooler in summer and warmer in winter.

Low Maintenance

Unlike traditional wooden or metal frames, UPVC requires minimal upkeep – no painting, no rust, just simple cleaning to maintain its pristine look.

Eco-Friendly & Sustainable

Unlike traditional wooden or metal frames, UPVC requires minimal upkeep – no painting, no rust, just simple cleaning to maintain its pristine look.

Weather Resistance

Engineered to withstand harsh climates, our UPVC windows and doors are waterproof, wind-resistant, and UV-stable, ensuring lasting durability in every season.

Our UPVC windows and doors are self-extinguishing and do not support combustion, ensuring enhanced safety in case of fire.

World of Windoor, we combine innovation, craftsmanship, and cutting-edge technology to deliver premium UPVC solutions tailored to your requirements. Whether you're building a new home or upgrading your space, trust us to bring elegance, efficiency, and lasting value to your interiors.

MATERIAL USED IN uPVC Doors & Windows

Premium accessories used: The hardware used in UPVC windows plays a crucial role in functionality, security, and durability. Here are some of the essential hardware components used in different types of UPVC windows:

Handles

- **Espagnolette Handle :** Commonly used in casement windows, operates with a multipoint locking system.
- **Cockspur Handle :** A simple handle with a latch mechanism, often used in older window designs.
- **Tilt and Turn Handle :** Specially designed for tilt and turn windows, allowing dual operation
- **Sliding Window Handle :** Used in sliding windows for smooth opening and closing.

Hinges

- **Friction Hinges :** Allow smooth opening and hold the window in place without additional stays.
- **Butt Hinges :** Traditional hinges used for basic casement windows.
- **Egress Hinges :** Designed for emergency exits, allowing a wider opening.
- **Restrictor Hinges :** Limits the opening angle for child safety and security.

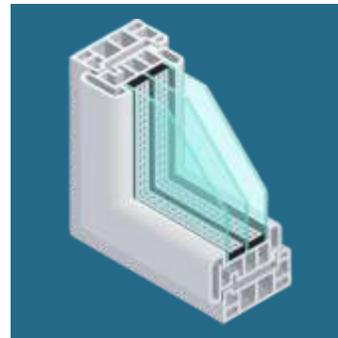

Locking Mechanisms

- **Multipoint Locks :** Provide enhanced security with multiple locking points along the window frame.
- **Shoot Bolt Locks :** Offer additional locking points for increased protection.
- **Espagnolette Lock :** Works with handles to engage a multi-lock system.
- **Crescent Lock :** Commonly used in sliding windows for secure closure.

Rollers (For Sliding Windows)

Single/Double Track Rollers – Ensure smooth sliding motion.
Heavy-Duty Rollers – Used for larger sliding windows to support more weight.

Weather Seals & Gaskets

EPDM Rubber Gaskets – Provide airtight sealing for better insulation.
Brush Seals – Used in sliding windows to prevent dust and air leakage.

Fasteners & Fixings

Anchor Screws & Fasteners – Ensure firm installation of the window frame.
Glazing Beads – Secure the glass panel in place within the frame.

WORLD OF WINDOORS

UPVC WINDOW & DOORS

Sliding windows and doors offer a sleek, space-saving design that allows for effortless operation and a modern aesthetic. Built with high-quality UPVC, they provide excellent insulation, durability, and enhanced security. These windows and doors glide smoothly on precision-engineered tracks, making them ideal for homes, offices, and commercial spaces where space optimization and ease of access are key.

KEY BENEFITS OF

SLIDING WINDOWS & DOORS

- **Smooth & Effortless Operation** – Designed with high-performance rollers for easy sliding.
- **Space-Saving Design** – No inward or outward opening, making them perfect for compact spaces.
- **Energy Efficiency** – Superior insulation helps maintain indoor temperature and reduce energy costs.
- **Noise Reduction** – Effectively blocks external noise for a quieter, more comfortable environment.
- **Low Maintenance** – Resistant to rust, corrosion, and weathering, requiring minimal upkeep.

AVAILABLE CONFIGURATIONS

- **1 Fix + 1 Sliding** – One fixed panel and one movable panel for simple operation and ventilation.
- **2 Track 2 Panel** – Two panels on a two-track system for a balanced and functional design.
- **2 Track 4 Panel** – Four-panel system, with two sliding and two fixed panels, offering a larger opening.
- **2.5 Track** – Enhanced track system for better flexibility and performance.
- **3 Track 3 Panel** – Three sliding panels on three tracks for a wide, seamless opening.
- **6 Panel** – Grand design for large openings, ideal for patios and balconies.

CASEMENT WINDOWS

Casement windows combine classic aesthetics with modern performance, offering excellent ventilation, security, and insulation. Designed to swing open like a door, they allow maximum airflow and are easy to operate with a simple handle mechanism. Our UPVC casement windows are perfect for homes, offices, and commercial buildings, providing durability and energy efficiency in a stylish package.

TYPES OF

CASEMENT WINDOWS

- **Openable Windows (Left & Right)** – Hinged on the sides, these windows swing outward for a wide, unobstructed opening.
- **Top Hung Windows** – Hinged at the top, allowing controlled airflow while keeping out rainwater.
- **Down Hung Windows** – Hinged at the bottom, offering a unique design for ventilation and security.

VENTILATION AND LOUVERS WINDOW

Ventilation and louvers windows are designed to enhance airflow while maintaining privacy and protection against external elements. These windows are ideal for areas requiring continuous ventilation, such as bathrooms, kitchens, and utility spaces. With adjustable slats, they provide controlled airflow and help maintain a comfortable indoor environment.

KEY BENEFITS OF

VENTILATION & LOUVERS WINDOWS

- **Optimal Air Circulation** – Allows fresh air in while keeping dust and rain out.
- **Privacy & Security** – Designed to provide ventilation without compromising security.
- **Low Maintenance** – Made from high-quality UPVC that resists rust, corrosion, and moisture.
- **Energy Efficiency** – Helps reduce humidity and improves air quality indoors.
- **Modern Aesthetic** – Sleek, functional design that complements any space.

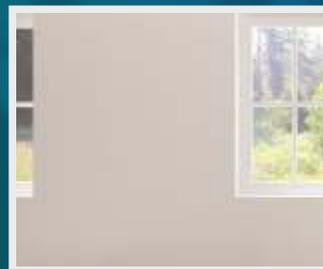

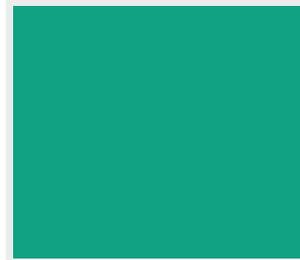

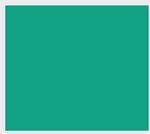

COMBINATION WINDOWS

Combination windows are a perfect blend of functionality and aesthetics, allowing multiple window types to be integrated into one frame. These windows offer the versatility of various styles, ensuring better ventilation, enhanced views, and superior insulation. Ideal for large openings, they are commonly used in living rooms, offices, and commercial buildings where both airflow and natural light are essential.
